## Anti-Pick 110 by Anti Ligature Shop

### Product Features

**Don't just Fix it Anti-Pick it...**

Introducing all new ALS **Anti – Pick 110 Sealant**. Our new advanced formula has been developed through unrivalled research and development as well as market research within the health care sector.

110 contains a fungicide to combat mould & bacteria growth

#### Areas of use

ANTI PICK 110 sealant is suitable internal or external use

Secure environments

Communal areas

### Application

Surfaces to which Sealant is to adhere must be clean and free from loose material, standing water or contaminants, which otherwise may impair the bond. Non-porous surfaces such as aluminium should be cleaned with a suitable product. It may be necessary to prime some porous surfaces depending on cohesiveness and porosity of the substrate. For application where some movement will be exhibited i.e. construction joints, the minimum joint dimensions should be 6mm x 6mm with the maximum dimensions being 20mm wide by 12mm deep. Where deeper joints are found, depth can be reduced using a suitable backer rod. Areas of perimeter pointing where a fillet is to be applied, the minimum measurement across must be 10mm with a minimum depth of 6mm. If conditions are suitable for application, ensure joints are properly prepared and apply sealant firmly into the joint using an application gun. Ensure a good solid fill is achieved. Once applied, sealant can be tooled within 10 minutes to required finish.

### Information

Available in **Blue, Black, White & Grey**

**Shelf Life** 12 months

**Curing Time** 4 to 24hrs depending on bead thickness

### NBS Specification

The anti-ligature design features of this product are not intended to replace or substitute the need for necessary supervision of those who may be at risk, or for other necessary protective measures to be taken in the specific circumstances of usage. Anti-Ligature Shop does not claim any product to be totally ligature free or make claim that they cannot be damaged with regard to anti-vandal feature. It is therefore the customers responsibility to ensure the suitability of the product for the environment in which they are to be fitted.
