

Ligature Resistant Products

Supplying products to create a safer environment

Exclusive distributor of the Request to the

NHS

The only one stop shop for anti-ligature products in mental health care

Anti-ligature Group is a leading supplier of modern ligature products in the UK. We provide complete environmental safety solutions to manage the risk of suicide within mental health care environments.

Our new supplying products from leading suppliers we design and manufacture our own range of products that eliminate, reduce or mitigate the risk of suicide.

We supply our own products to ensure a safer environment.

ALG GROUP

We are extremely proud to announce that we have now entered a strategic partnership with the creator of the Safelymad, New Britain of PMA, to become the exclusive distributor of the Safelymad and its underlying products in the UK.

ALG services

In addition to supplying safe products we can also provide our customers with:

- 1. Consultancy services to reduce environmental suicide risk
- 2. Product testing and development
- 3. New build and refurbishment products specifications
- 4. Training in environmental safety products awareness and testing utility
- 5. Training on specific products to ensure they are fitted and used correctly

Help and Guidance

Anti-ligature Group technical team are always available to offer help and guidance on all your selected ligature enquiries. Whether it's products guidance or help in identifying the right product for your specific environment, the team will ensure the you to help decide the best solution.

ALL Training

The purpose of our training is to provide clear guidance to the same type workers when using the equipment. The equipment has been specifically designed to offer an efficient and safe method of using wireless attachments in person or the vehicle exhibiting the emergency.

Training Kit

The equipment training program was designed to assist training by allowing personnel undergoing training to handle equipment, experience using through a variety of materials that would be used as they would be in real emergency situations.

History of a life saving tool

The original Red/Black was designed by Steve Collins, Don's brother-in-law. Over those years the Red/Black has been refined and improved and is now the most widely deployed lifeboat in the world's life saving tool.

Red/Black was designed a product superior to anything else available on the market. The new implement could be small and light yet have sufficient strength, strong and strong blades of stainless steel, a cutting through almost any material, heavy, thin, thin, thick, cutting, heavy-duty, new, thin, thin, cutting and more.

The concept was that the product should be able to deal with a variety of potential situations where emergency relief was needed, rescue, rescue, other, thoughtful, or a situation that an arrangement, rescue or light.

The Red/Black has been heavily tested and evaluated by many national and international government agencies and always found to be for purposes in a field of application and in many instances has more than exceeded expectations.

Red/Black Features

Red/Black was designed and developed with an exceptionally high quality, practical and functional that not only save their life, but that of their fellow man.
